HPC Compressors

HPC Compressors, a leader in the UK market for fifty years, HPC's "yellow-box" compressed air systems can be found throughout British industry, from workshops and garages to factories and power stations.

In partnership with **KAESER Kompressoren SE**, HPC provides its customers with the most reliable and efficient Compressed Air Systems. The partnership with KAESER of Germany is at the heart of HPC's business.

Rotary Screw Compressors from HPC

Rotary screw compressors supply production processes in industry, trade and workshop applications with a reliable supply of quality compressed air. The preferred choice for users requiring constant pressure over prolonged periods.

To ensure that HPC KAESER rotary screw compressors operate as efficiently as possible, KAESER developed its own special rotor profile. SIGMA profile rotors provide you with energy savings of up to 15% compared with conventional rotor profile designs.

Combine this with in-house high-end manufacturing processes with lowest possible manufacturing tolerances and you have an exceptional product.

HPC KAESER Blowers - The ultimate quiet powerhouses

Low-maintenance HPC KAESER blowers deliver pressurised air quietly and efficiently for a wide range of applications:

- ✓ for pneumatic conveying of bulk materials
- ✓ in water management – for example biological treatment and filter flushing
- ✓ for the production of blowing and cooling air for industrial purposes
- ✓ in mobile applications – for example animal feed mixing, tanker discharge, suction vehicles and airport runway cleaners
- ✓ in hazardous environments (ATEX Certified range available)

HPC KAESER Reciprocating Compressors - Ideal for fluctuating or low air demand applications

The optimal duty cycle for reciprocating compressors is between 60 and 70%. As such, they are the best choice for high-fluctuation operation with load peaks – especially for trades, workshops, light manufacturing and small industry.

The comprehensive range of HPC KAESER reciprocating compressors includes portable and stationary models, oil lubricated and oil free options, complete modular systems, boosters and specialist OEM turnkey stations.

MOBILAIR Portable Compressors

HPC KAESER MOBILAIR Screw Compressors are powerful, portable machines for providing compressed air on a construction site for applications such as road breakers, power moles, sand blasters, fibre blowing, cavity wall installation or in industry as temporary machines or for specialist applications.
