

# TamTurbo

**Tamturbo Oil-Free VSD air compressors** offer high efficiency and outstanding savings in both energy and maintenance. Learn how our Touch-Free™ turbo compressors are utilized in a variety of industrial compressed air applications.

Compressed air production is an integral part of most industrial manufacturing processes. It is used in almost every industrial plant to power machines, tools and processes and to move materials in different ways. Compressed air is a basic utility, comparable to electricity, water and heat. The difference is that industrial plants do not need to produce their own power, water or heating, but they are almost always required to take responsibility for producing compressed air.

**Tamturbo® Touch-Free™ turbo compressors** are 100% oil-free and by far the most sustainable air compressor solution on the market. With the lowest total cost of ownership, Tamturbo air compressors deliver significant savings from the biggest costs of owning an air compressor: energy and maintenance.

**Tamturbo® 100% oil-free turbo compressors** have better and more persistent energy efficiency compared to traditional “oil free” screw compressors, so you will see significant savings in your electrical costs. Additionally, unlike “oil free” screw compressors, Tamturbo air compressors do not lose their efficiency due to wear. This means that you will see a lifetime of consistent high efficiency that extends throughout the wide capacity turndown range. **Tamturbo's Touch-Free™** technology operates with practically no wear and tear, eliminating the need for conventional maintenance. For our customers, this means financial savings and less unnecessary maintenance downtime, and it also extends the technical service life of the equipment, which reduces the environmental burden caused by waste.

Suitable for the following applications:

- ✓ Manufacturing industry
- ✓ Textile industry
- ✓ Electronics industry
- ✓ Automotive industry
- ✓ Pharmaceutical and medical
- ✓ Pulp and paper industry
- ✓ Food and beverage industry
